to the best possible specimens of men and women. The Paw Paw school, with its complete Manual Training department for the boys; its Domestic science department for the girls; its fully equipped laboratory for chemistry and physics; its large public library; and other facilities fulfill all the requirements for a modern school.

The High school has two literary societies which hold sessions regularly. These societies afford advantages which many schools do not have. Athletics are not neglected. In fact athletics is an important factor in Paw Paw school life. The school has a ten acre tract two blocks from the school building, and here the boys may be found daily in preparation for the various athletic events to be held at the close of the school year. The School also has a brass band and orchestra of which it is justly proud. These musical organizations are in charge of the principal, Mr. Patty, who is a competent musical instructor and director.

Many in the rural districts have recently been inquiring about the various schools of the county, and wondering where is the best school to send their

this year", the answer is "To the Paw Paw High" for many reasons. The social and moral standing of the community is the best. Non resident pupils are given all the advantages of the resident student, and the opportunities afforded in the Paw Paw school cannot be excelled.

The Paw Paw school is most fortunate in the selection of its school board. Its members are among the best citizens of the community, and give liberally of their time and energy to make the school second to none.

The schools this year will be in charge of Superintendent V. R. Hungerford, who needs no introduction to the read-

strong in athletics, and years ago was a rival of Prof. J. A. O'Leary on the athletic field.

The Principal, Mr. Patty is also a strong member of the faculty. This will be Mr. Patty's second year in this position, and the school is indeed fortunate to retain him. In fact the entire

faculty from start to finish has been selected with great care. Every teacher is a specialist in the department over which he will have supervision. Following is the complete faculty for the year:

sons and daughters. The secretary of the school board, Mr. T. J. Cavanaugh has a neat folder, giving the courses of instruction, and the many advantages afforded by the local school, which he will be pleased to mail to any one desiring it. Last year the non-resident attendance was larger than in any former year, and from the applications already received the indications are that this year will eclipse the year of 1914.
